## Experience

04/2020 - 07-2021

Fiverr

### Front end developer

I worked in Fiverr as a freelancer, I developed and designed dozens of landing pages and websites, I have successfully landed 164 jobs and got 113 5 stars reviews from my clients and most of them were happy to work with me multiple times as I provide support and good communication to solve their needs the best way possible.

09-2022 - 01-2023

Sitenco software development agency | France

### Full stack developer

I joined Sitenco's team while they were working on a large scale project, and we managed to finish a big part of it, my role was developing backend modules, adding more features and transferring Figma designs to HTML, CSS, Bootstrap, JS and Laravel web pages.

02-2022 - 05-2023

247Labs software development agency | Canada

### Backend developer

I joined 247Labs as a backend developer, the team was working on web application for a big insurance company that needs to manage their insurers and insureds all over the world in one place, my role was to design an API to use in the frontend.

05-2022 - 06-2023

Meto - A non profit organization | Fairfax, Ohio

### Team leader

When I joined Meto, the team didn't have much left to finish the project, my main role was to make sure that the project has a good architecture, optimized, well structured, clean coded and has the best practices of Laravel, because the project was going to potentially handle more than 100k users.
